TUBULAR BATTERY SYSTEMS

QUICK CHARGE • HIGH CAPACITY • LOW MAINTENANCE

Power Technology batteries are the perfect mix of European technology with US standards and weight, combined with the higher capacity and efficiency of tubular cells in the same size tray with the robust design of a flat-plate battery.

Why settle for less when you can have the best of both worlds?

Features:

- Tubular technology
- Meets and exceeds US weight standards for forklift balance
- Quick charge time
- High capacity
- Easy maintenance
- Superior durability
- High resistance to vibration
- Better heat resistance
- Minimum water consumption
- Bolt-on cables available
- Available in DIN sizes
